

Tullow Local Area Plan

2010 - 2016

NOTE: It is the Council's policy that approvals to residential developments of more than 2 units shall not commence before 1st May, 2011.

Eighteen	Civic and Community Facilities in Tullow	39
Nineteen	Clubs and Societies in Tullow	40

INTRODUCTION

Carlow County Council may prepare a Local Area Plan in respect of any area, which requires economic, physical and social renewal. The Planning and Development Acts 2000 - 2006 require that a Local Area Plan shall be consistent with the objectives of the County Development Plan and shall consist of a written statement and a plan or plans indicating the objectives in such detail as may be determined by the planning authority for the proper planning and sustainable development of the area to which it applies, including detail on community facilities and amenities and on standards for the design of developments and structures.

This Local Area Plan outlines the actions that will most effectively facilitate achievement of the social, economic, cultural and environmental objectives arising from public consultation and the expressed views of the Elected Members of Carlow County Council and Tullow Electoral Area. The Local Area Plan will promote the proper planning and sustainable development of Tullow for the six-year period up to 2016 and will have regard to any Regional Planning Guidelines made for the South East Region.

The Development Strategy takes cognisance of the *Regional Planning Guidelines Review – Gateway and Hub Population Targets – October 2009* issued by The Department of the Environment, Heritage & Local Government (Appendix 1). Members of the Planning Authority recommend that the South Eastern Regional Planning Authority give discretion to Carlow County Council with respect to the population targets element of any proposed Regional Planning Guidelines. This Local Area Plan reflects the need for economic growth and the use of zoned and serviced lands to cater for population growth and a competitive availability of suitable lands for economic development.

SECTION ONE – BACKGROUND

Tullow (Tulach O’ Bhfeidhlim the hill of the O’ Bhfeidhlim territory) is situated on the River Slaney, 9 miles from Carlow, 11 miles from Baltinglass and 50 miles from Dublin. It is prosperous market town with a good agricultural hinterland and a developing light engineering background.

Tullow is one of five settlements in Carlow originating from Anglo Norman Times. Along with Leighlinbridge and Carlow Town it has survived as a population centre since that time.

The town declined in size during the later Middle Ages, but with the revival of English influence in Ireland during the sixteenth and seventeenth centuries, the town took on a new prosperity and much of its present layout particularly around Market Square originated from that time.

Tullow Town centre has altered radically in recent years with the introduction of Tullow Inner Relief Road promoting riverside development, the construction of in-fill housing schemes off Barrack St and the removal of industry to the perimeter of town. The local economy has been greatly boosted by the resort development at Mount Wolseley, which includes extensive golfing and leisure facilities along with varying accommodation needs. Welcome development has taken place on the west side of town, which includes industrial activity along with further residential development. The new industrial estate provided by Carlow County Council has been particularly successful and is adjacent to two proposed attractive commercial estates.

The development of Tullow Town Park, major retail developments and increasing population highlight the prosperity of Tullow until recently. The current slowdown in the economy is typified by the existence of over 100 unsold residential units. Future growth will occur with the completion of the M9 motorway, nearby, to Dublin and Waterford.

SECTION TWO – PUBLIC CONSULTATION/ISSUES

Under the provisions of the PLANNING & DEVELOPMENT ACTS 2000 - 2006, a Planning Authority may at anytime prepare a local area plan in respect of any particular area within its functional area. A Planning Authority shall take whatever steps it considers necessary to consult the public before preparing a local area plan. Carlow County council has consulted with local groups and business interests by way of submission, public meeting and local workshop in relation to the above plan.

The Local Area Plan will consider the above issues in conjunction with strategies for economic development, settlement, service provision and community/amenity development. The Local Area Plan will indicate a development strategy, appropriate policy and specific objectives, which will progress resolution of the above issues and the achievement of development targets. The process will be informed by the policy guidelines adopted in the National Spatial Strategy and the proposed Regional Planning Guidelines.

The issues outlined will be considered in this plan in conjunction with; present status, proposed policy and specific objectives, which will relate to the Local Area Plan period.

SECTION THREE – STRATEGIC FRAMEWORK

Strategic Framework

Tullow Town Environs has a range of strategic roles. At a local level the town and its environs have the potential to meet the development needs of the area, providing for residential, commercial, recreational and industrial needs. At a county level the development of key uses within the environs area will reinforce the development of Tullow as a significant settlement in the South East, provide for identified development pressures such as housing demand and promote the town as a development node. At a regional level the development and expansion of the town will promote the overall development of the South East Region. Close proximity to large urban centres, including Dublin, will attract considerable future development.

Tullow is an important urban settlement in County Carlow with a current population of 3,300 approx. There are a number of established industries and businesses in the area. The town is well served by primary and secondary schools, adequate childcare facilities and avails of third level educational facilities at nearby Carlow town. Located on the River Slaney the town is central to a thriving agricultural hinterland. Tullow has benefited significantly from the overall expansion of economic activity of the South East region. Tullow in common with other small towns is suffering reduced employment and prosperity in the current economic climate.

The town is well located in relation to the road infrastructure in the region and is proximate to the M9 and M1 motorways, Dublin – Waterford and Dublin – Belfast respectively. Local infrastructure, townscape and River Slaney amenity have improved the attractiveness of the town as an industrial growth centre and as a residential settlement. Recent promotion of industrial development and active town centre renewal have dramatically enhanced the growth prospects for the Local Area Plan period. Imminent housing development presents a challenge to provide adequate community, amenity and recreational facilities. Tullow is well located and equipped to avail of regional tourism growth.

This plan will endeavour to provide a framework, which will facilitate ongoing development of residential, commercial, industrial and recreational facilities. Tullow will fulfil its role as a key settlement within County Carlow and the South East Region as a whole.

SECTION FOUR – DEVELOPMENT STRATEGY

4.0 Development Strategy

The Proposed Local Area Plan will provide for the proper planning and sustainable development of the Tullow Environs for the period 2010 – 2016 while also promoting the aims of national policy and objectives.

The plan sets out lands that will be suitable for possible development during the plan period. The approach is based on the need to identify the entire development area and zone lands for development in those areas while;

- 1 Zoning lands for development purposes that will provide for a range and mix of uses and set out urban design and development control objectives for their development,
- 2 Identify infrastructure works of local and regional benefit.

This approach is the most effective mechanism to allow for the development of Tullow and its environs in a controlled manner that will maximize the potential of town centre and environs development.

The Development Strategy takes cognisance of the *Regional Planning Guidelines Review – Gateway and Hub Population Targets – October 2009* issued by The Department of the Environment, Heritage & Local Government (Appendix 1). Members of the Planning Authority recommend that the South Eastern Regional Planning Authority give discretion to Carlow County Council with respect to the population targets element of any proposed Regional Planning Guidelines. This Local Area Plan reflects the need for economic growth and the use of zoned and serviced lands to cater for population growth and a competitive availability of suitable lands for economic development.

4.1 Identifying Development Lands

The recommended development lands have been identified having regard to the need to promote a compact urban form with easy access by foot to public services, transport, community and recreational facilities.

The Local Area Plan development strategy is illustrated in the attached plan. The plan illustrates the proposed zones for a range of land uses that should be developed in line with guidance contained in this document and consistent with the standards of the County Development Plan.

The proposed plan will be known officially as the Tullow Local Area Plan 2010.

SECTION FIVE – POPULATION/EMPLOYMENT

PROFILE

5.1 Population

The published data from the 2006 Census and inclusion of other persons in the immediate town area are used to confirm the population total for the Local Plan area. The population for the Tullow Area is approx 3,300 persons. This figure represents an increase of over 10% in the population since 2004.

5.2 Employment Profile

Tullow did benefit from the general increase in national employment levels with increasing job opportunities in nearby Carlow and Dublin. Tullow residents now include an increasing number who commute to work in Dublin and other parts of the greater Dublin region. There are very limited local employment opportunities in any sector. Tullow now shares the impacts of the current negative economic climate.

The particular drop in the numbers employed in the construction industry will impact on the trades and skilled labour sectors.

SECTION SIX – RESIDUAL LANDS ANALYSIS & FUTURE LAND REQUIREMENT

The identification of zoned and undeveloped lands within the local area plan have been carried out, from this, lands can be classified into distinct categories.

- **Residential Lands**

There is planning approval for up to 300 units at low density residential lands and for a further 400 units at normal residential zoning. There are over 100 unsold dwellings.

- **Industrial lands**

There are 32 hectares approx. zoned for industrial development. Development has commenced on these lands most notably on those land adjacent to the Carlow road. These lands will cater for local industrial firms.

- **Commercial/Town Centre Lands**

There are 50 hectares approx. of commercial/town centre activity. The cohesiveness of this activity has been strengthened by local enterprise, town renewal development and considerable community based amenity work. The area adjacent to the new relief road has not benefited from this activity.

6.1 Issues

Lands within the environs area have the potential to be developed and served by the existing services and proposed extensions to infrastructure. These lands can be developed for a range of uses including residential, commercial, industrial and amenity lands.

6.2 Policy

It is the policy of the Council to identify development lands within the Tullow town environs area to meet potential development requirements relating to the above issues. It is the Councils policy to insure that adequate amenity and recreational facilities are provided in conjunction with the increased settlement population.

6.3 Specific Objectives

It is the policy if the Council to;

- Limit availability of lands for high-density residential development.
- Promote and develop existing industrial land base
- Designate lands for amenity and recreational purposes, such lands are now critical to the amenity of new housing development on the west side of town.
- Provide low-density residential lands at perimeter of existing development.

- Provide lands for industrial development adjacent to existing industrial estate.
- Provide lands for mixed-use development to allow for more flexible commercial development and to catalyse growth.
- Designate lands for amenity and recreational purposes. These lands (8 hectares approx.) include the continuation of the River Slaney parkland amenity and a new town park, integrating St. Austin's Abbey and the Slaney amenity to the developing town centre.
- Zone adequate serviced lands for residential development to ensure a competitive market for suitable houses.

SECTION SEVEN – URBAN FORM, STRUCTURE & RESIDENTIAL DEVELOPMENT

Tullow is a comparatively old town originating from Anglo-Norman times, the town declined in size during the later middle ages but evolved during the 16th and 17th centuries as a market town. The present layout evolved around Market Square with a compact town centre. Development in recent years has progressed to residential activity. There has been welcomed town centre residential development. Through the benefits of the town renewal scheme some lands adjacent to the town centre have to date been available for desirable and required development. Although residential and commercial development to date has been well located there is a deficit in the provision of recreational amenity areas. The current plan will endeavour to address some of the above matters.

7.1 Issues

1. The recently issued document – Sustainable Residential Development’s in Urban Area – guidelines for Planning Authorities, 2009 – state that “the overall order and sequencing of development of small towns and villages must avoid significant so called “leap-frogging” where development of new residential areas takes place at some remove from the existing contiguous town/village and leading discontinuities in terms of footpaths lighting or other services which militates against proper planning and development”. This document also states that “new plans for the types of smaller towns and villages mentioned above should encourage interventions designed to open up development opportunities such as town or village centre renewal, redevelopment of derelict sites or the development of mixed use proposals in order to stimulate new economic development.”
2. The development of high densities may not be appropriate in all areas. Areas have been identified as appropriate locations for the provision of higher density developments these include:
 - a) Infill sites and other undeveloped (zoned and serviceable lands)
 - b) Transport Routes/Access Nodes.
3. The development of high densities will not be appropriate in all areas. Areas have been identified for lower density development at the perimeter of existing development areas – in accordance with Sustainable Residential Development’s in Urban Areas – guidelines for Planning Authorities, 2009 and Best Practice Urban Design Manual, 2009.
4. National Spatial Strategy/Regional Planning guidelines.
5. Need for development lands for mixed uses and industrial purposes.
6. Requirement of amenity and recreational facilities.

7.2 Policy Response

It is the policy of the Council to:

- 1 Encourage the development of limited mixed-use areas so as to provide opportunities for employment generating activities in proximity to residential areas that do not interfere with residential amenity.
- 2 Require high standards of design and layout from all developments so as to ensure the creation and development of an attractive residential and employment environment. High standards of landscaping and amenity areas will also be required in order to promote the development of a sustainable environment capable of serving local needs.
- 3 Designate lands for amenity purposes
- 4 Identify areas suitable for industrial and mixed use development.
5. It is the policy of the Council, as required under Section 95 of the Planning and Development Act 2000, as amended, that 20 per cent of land zoned for residential use, or for a mixture of residential and other uses, shall be reserved for the provision of housing for the purposes of either or both:
 - (i) Housing for persons referred to in Section 9(2) of the Housing Act, 1988
 - (ii) Affordable housing (as defined at Section 93 of the Planning Act, 2000, as amended)

Where developments solely provide for the accommodation of special needs groups, the elderly or students there may be no requirement for the provision of land for social and affordable housing. Conditions attached to planning permissions for residential development to which the 20% social and affordable housing quota applies, will require applicants to enter into an agreement with the relevant planning authority. Such agreements will provide options for site transfers as set out in the legislation.

In determining the number of social and affordable units to be provided and a description of the proposed units, the Council will have full regard to:

- (a) The policies contained in the County Development Plan, Tullow Town Centre Local Area Plan, Regional Planning Guidelines and Sustainable Residential Developments in Urban Area's, 2009.
- (b) The need to ensure the overall coherence of the development,
- (c) The views of the developer with regard to the impact of the agreement of the proposed development,
- (d) The need for social integration.

The accommodation needs of the travelling community have been specifically dealt with through the preparation and implementation of the Travelling Accommodation Programme. The Council will continue to implement and monitor the operation of this programme and will meet their obligations regarding the provision of adequate and suitable accommodation for the Travelling community through consultation with Travellers and the general public.

5. It is the Council's policy to promote the protection of trees of amenity value in the area where these contribute to the character and amenity of the area and are likely to be removed as part of any development.
6. It is the Council's policy that approvals to residential developments of more than 2 units shall not commence before 1st May, 2011.

7.3 Specific Objectives

It is the objective of the Council to:

- 1 Require the development of zoned lands for the uses identified in the attached land use zoning map and as per the uses Permitted in Principal and Open for Consideration.
- 2 New development shall incorporate the existing natural features and particularly those natural features such as mature stands of trees, hedgerows, established walls and boundary treatments. The preservation of these features, many of which represent long established boundaries in the plan area will be sought by the Planning Authority. These represent features of importance in encouraging the sustainable development of emerging urban areas set out above. Where necessary the retention and replacement of these features will be required as a condition of planning permission in order to ensure the retention and improvement of the areas character. Landscape considerations will take into account the impact on any elements of demesne designed landscape.
- 3 Within new housing estates, pedestrian and vehicular movements should be convenient, safe and pleasant. In order to comply with the 'European Charter of Pedestrian Rights' it will be an objective to improve facilities for pedestrians and access to such facilities for people with disabilities. Improved pedestrian and cycling facilities will be prioritised as part of an integrated approach to the management of movement. In addition, estates should be so designed to ensure that the opportunities for crime and vandalism are reduced to the greatest possible extent.
- 4 In recognition of the role that roads have in children's play, all efforts should be made to eliminate through-traffic from new housing schemes and long straight roads should be avoided. Where such long straight roads are unavoidable, traffic-calming methods should be provided. Housing layouts consisting of short cul-de-sacs with good provision for pedestrian safety and preferred.
- 5 Shared surfaces in residential areas (i.e. the provision of areas shared by vehicles and pedestrians where footpaths are not provided) will only be acceptable where vehicle speeds are at or near walking pace due to design features such as curves, ramps, pinch points or other design features.
- 6 In residential developments parking provision shall be provided off the carriageway, principally within the house curtilage for residents and in grouped parking areas for visitors. In cul-de-sacs, the turning circle shall be adequate to provide for visitor parking and also to permit public service vehicles to turn.
- 7 The standard applicable to public open space in residential developments is as follows:
 - In green-field sites or those sites for which a local area plan is appropriate, public open space should be provided at a minimum rate of 15% of the total site area. This allocation should be in the form of useful open spaces within residential developments and, where appropriate, larger neighbourhood parks to serve the wider community;

- In other cases, such as large infill sites or brown field sites public open space should generally be provided at a minimum rate of 10% of the total site area; and
 - In institutional lands and ‘windfall’ sites which are often characterised by a large private or institutional building set in substantial open lands and which in some cases may be accessible as an amenity to the wider community, any proposals for higher density residential development must take into account the objective of retaining the “open character” of these lands, while at the same time ensuring that an efficient use is made of the land. In these cases, a minimum requirement of 20% of site area should be specified; however, this should be assessed in the context of the quality and provision of existing or proposed open space in the wider area. Whilst the quantum of open space may be increased vis-à-vis other sites, the amount of residential yield should be no less than would be achieved on any comparable residential site. Increasing densities in selected parts of the site subject to the safeguards expressed elsewhere may be necessary to achieve this.
 - In cases where a developer has control of lands zoned both residential and amenity, the developer is required to bring forward proposals to develop the amenity lands at the same time as developing residential lands.
8. Generally, new developments may not be carried out in front of an existing building line or sited where it would conflict with a building line as established or determined by the planning authority.
9. Proposals for mixed-use developments on large sites of 10 hectares or more within the plan area should provide a master plan detailing the development proposed, urban design concept layout, design details such as landscaping and boundary treatments to ensure that the character of any development is consistent with the established built environment, is of high quality and can be incorporated into the surrounding topography and environment. Where such developments provide for residential development the application of design approach utilised in the Best Practice Urban Design Manual, 2009, Design Standards for new apartments, 2007 and Sustainable Residential Developments in Urban Area’s, 2009, should be considered by all applicants in developing high quality developments. Development on these sites must:
- Make a positive contribution to its locality and take best advantage of its location by the use of site topography, i.e. levels, views, landscape and design orientation, i.e. sunlight and daylight, to optimise sustainability.
 - Have a sense of identity and place and legible spatial hierarchy associated with the places within and the routes through the scheme.
 - Have a public area design, which is guided by the best principles of passive surveillance to encourage a safe sense of place and discourage anti-social behaviour.
 - Be characterised by an easily legible design approach to the grading from public to private areas.
- 10 Provide lands suitable for low density residential development at appropriate locations both in the interests of the provision of serviced sites for those who would avail of same and in accordance with the proper planning and development of the area. Developers of residential lands are to provide a minimum of 10% of the residential area for the provision of serviced sites for sale to the general public.

SECTION EIGHT – TRANSPORTATION & TRAFFIC MANAGEMENT ASSESSMENT

- Tullow is located on the N81 Wexford to Dublin route. This route has been subject to increasing demand by Wexford traffic accessing the motorway system to Dublin and locations north of Dublin.
- The town is also served by the regional route from the east coast to the midlands, i.e. Gorey/Courtown to Carlow/Portlaoise.
- The town street system especially Church Street and Bridge Street does not have the capacity to cater for through traffic especially that of heavy goods vehicles using the east-west corridor.
- Alterations to the traffic management system will be put in place – in conjunction with the Garda authorities.
- Tullow is located within ten minutes of the proposed Dublin/Waterford motorway.

8.1 Issues

- 1 The availability of an efficient transport system is vital for the development of Tullow, as it will enhance the capability of the town to support the business, commercial and manufacturing activities that are crucial for its continued development. The transport system includes all relevant modes of transport and types of transport infrastructure.
- 2 It is the aim of the Council to facilitate a safe and integrated system of public and private transport so as to encourage the expansion of business activities in Tullow.
- 3 Tullow's location on the M9 corridor is an important factor in the town's development, as it provides links to the sea and airports of Dublin and Waterford. The location of this proposed new road is an important factor affecting the physical expansion of Tullow. The positioning of interchanges with the existing road system serving Tullow will have an influence on the location and viability of new industrial and business areas that are developed, as accessibility to this transport corridor is an important business determinant.
- 4 The relief of the town centre traffic congestion due particularly to heavy goods vehicles using the east west corridor.
- 5 Traffic congestion/lack of car parking at Church Street and Market Square.
- 6 Provision of bus parking bay(s) in Tullow.

8.2 Policy Response

“*Smarter Travel – A Sustainable Transport Future*”, published in February 2009, is the new Government policy for transport in Ireland. It is complemented by Ireland’s First National Cycle Policy Framework, which was launched in April 2009. Both policies set a vision for a radically new approach to travel and transport to year 2020.

The main objectives of the policy are

- To encourage Smarter Travel, (i.e. to reduce overall travel demand)
- To maximise the efficiency of the transport network
- To reduce reliance on fossil fuels and therefore to reduce transport emissions
- To improve accessibility to transport

The Local Area Plan requires that:

- 1 The location and size of developments should be considered in relation to existing and proposed road and transport infrastructure. Where possible, transport infrastructure should be provided in concert with developments.
- 2 The location of new employment centres must be considered in relation to residential areas to minimise the need for car commuting.
- 3 Public Transport is an important element of development strategy that could have impact on the siting of developments. Ideally, provision of public transport facilities and services should form part of new development proposals.
- 4 The Council will encourage and facilitate the efficient growth of public transport and to promote its maximum use by the travelling public. Public transport routes and services should be designed to provide for both commuting and off-peak demands.
- 5 The Council will co-operate with Iarnród Éireann, Bus Éireann, private bus companies, rural transport companies and taxi operators in the provision of an efficient and integrated public transport network.
- 6 The Council shall take such measures as are necessary to facilitate public transport vehicles
- 7 Attention should be given to the provision of readily accessible information for the assistance of public transport users.
- 8 Alternative transport schemes such as car shared ownership and “smart” taxi services should form part of the transport strategy.
- 9 Public Transport provision should address the needs of commuters, pensioners, the aged, scholars, tourists and the disabled, and should be affordable, safe, secure, reliable and sustainable.
- 10 In order to have regard to the National Disability Authority guidance document

‘Building for Everyone’, the Council will seek to develop specific measures to provide for:

- The Provision of more disabled driver parking bays;
- The symmetrical alignment of street furniture so as to minimise obstruction to the visually impaired pedestrian;
- The introduction of more tactile paving at crossings, bus stops, etc;
- The further provision of ramps and kerb dishing at appropriate locations to improve movement of disabled people

- 11 The Council shall manage and maintain existing bus bays and taxi ranks and provide new ones where necessary.
- 12 Due attention should be given to the needs of freight transport when considering developments and infrastructure improvements.
- 13 The provision of facilities that encourage safe walking or use of cycles alongside existing or proposed transport infrastructure assists people to make the move from car-based transport to more sustainable modes. The design and layout of developments can also enhance the use of these modes, and should be encouraged.
- 14 On site parking facilities for workers, delivery vehicles and visitors is an important element of proposed new developments. These should be provided in line with County Development Plan standards.
- 15 It is Council policy to seek to improve the local road network of the town and it’s environs in order to provide a safe and efficient road network to cater for the current and future needs of the town.
- 16 The existing major road network will be improved and developed to accommodate the increasing volume of motor traffic. The main purposes of the urban road network will be to facilitate a more even distribution of traffic flows throughout the town and to improve accessibility between the various districts.
- 17 The Council will continue to improve certain existing roads and streets by the removal of bottlenecks and the alteration of intersections. Where necessary and appropriate, building and frontage lines of development sites will be set back to provide for long-term road improvements, provision of sight lines and improvements of traffic flows. In all improved streets, the Planning Authority will aim to minimise frontage vehicular access.
- 18 The Council shall strive to strike a balance between the demands for adequate road infrastructure by motor vehicle users and pedestrians, and the protection of the urban fabric.
- 19 In new developments public off-street parking facilities will be planned as an integral feature of shopping and community developments and will be located so as to permit joint and consecutive use of parking space by workers, shoppers, commuters and visitors alike.

8.3 Specific Objectives

The proposed local area plan identifies specific areas for development. These will generate a need for the provision of new supporting road infrastructure and improvements to existing roads.

The objectives given in this section result from the need to service existing and proposed development.

- 1 Confirm Tullow relief road system to facilitate by-passable traffic using the regional road network to east coast/midlands and the National Primary Road corridor, following detailed study of the traffic flow patterns.
- 2 Lobby the NRA to upgrade the Tullow to Castledermot Road to a National Secondary Road in view of its importance to Tullow and West Wicklow as a link to the new N9 Motorway.
- 3 Reserve corridors and complete Relief Road from N81 at Dublin Road to Regional Castledermot Road
- 4 Reserve corridors for relief road from the Shillelagh Road to N81 at Dublin Road and from the Shillelagh Road to the N81 at Bunclody and on to the Castledermot Road.
- 5 Continue to upgrade the condition of road and footpath surfaces in conjunction with the Council's annual roads programme.
- 6 Monitor and upgrade, where necessary, the standard of public lighting throughout the town.
- 7 Provide access roads to lands zoned for residential developments.
- 8 Provide lands for car parking adjacent to Church Street.
- 9 Reserve corridor for access to future development lands at the north of Church Street from Dublin Road and from Barrack Street.
- 10 Lands will be identified to accommodate parking for lorries, currently parking in residential areas.
- 11 Provide carparking facilities adjacent to proposed town park and town centre zone in the south east quadrant of the proposed Plan, with vehicular access from the N80 Bunclody Road. This car park will require pedestrian bridge access, as described, to the town centre.

SECTION NINE – RETAIL REQUIREMENTS

Tullow serves an extensive retail catchment area that includes adjoining areas in County Wicklow and to a lesser extent Wexford and Kildare. The core trading area of the town has been limited to the town centre with limited progression of retail units towards suburban development. The recent development of large retail units along with town renewal initiatives has enhanced town centre use and activity. Business units within the town include retail, restaurant, banking and professional service facilities. The progression of residential development towards the West of Tullow lacks local retail and service facilities.

9.1 Issues

- 1 Recent studies of the town suggest that sufficient retail demands exist within the plan area to justify the creation of additional retail space. Additional retail space will have to be provided within the development area to meet local demands and this will have to be of an appropriate scale and location so as to ensure that such retail space provides for local needs, does not detract from the town centre facilities and links effectively with the existing town centre so that there may be commercial synergy.
- 2 It is acknowledged that appropriate services and facilities will have to be provided within the developing areas to meet needs. Within this area the aim will be to ensure that sufficient retail facilities are located within the local catchment areas.

9.2 Policy Response

The Retail Planning Guidelines indicate that Local Authorities should do the following tasks:

- a. Confirm the role of retail centres and the size of main town centres.
- b. Assess the requirement for additional retail floor space.
- c. Provide strategic guidance on the location and scale of retail development.
- d. Draft policies to encourage the improvement of town centres
- e. Identify criteria for the assessment of retail schemes.

Carlow County council will prepare business development plans in conjunction with local stakeholders during the period of the Plan.

9.3 Specific Objectives

- a) **The role of retail centres and the size of main town centres:** The established retail core of Tullow Town must be maintained and promoted as the main retail centre in the immediate catchment area. Local retailing will be promoted in all smaller centres at central focal points and in areas where existing car parking is available. These areas will generally cater for neighbourhood provision to meet the needs of existing and proposed residential areas. These neighbourhood facilities must be centrally located.
- b) **The requirement for additional retail floor space:** Additional floor space will be allowed to meet emerging demands. All retail developments will be assessed in light of the provisions of the Retail Planning Guidelines 2000.
- c) **Strategic guidance on the location and scale of retail development:** Future retail provision should have regard to the application of the 'sequential test' in the identification of retail locations. In this respect the development of retail facilities in area identified as neighbourhood centre locations will be preferred.
- d) **Improvement of town centres:** No retail development should locate within the environs area that would have an adverse impact on the vitality and viability of the town centre. In this respect, local and neighbourhood retailing only will be encouraged.
- e) **Identify criteria for the assessment of retail schemes:**
In general terms any retail scheme proposed should:
- Have regard to the adequacy of existing retail shopping in the area.
 - The size and location of existing retail shopping outlets.
 - The effect on existing communities, including the effect on established retail shopping outlets and employment.
 - The need to counter urban decline and to promote urban renewal.
 - The impacts on traffic.
 - The potential for new retail facilities to provide for an expanding population.
 - The need for all retail development to promote good urban design and where developed in proximity to the Town Centre to encourage linkages to the town centre.
 - All retail schemes in the region of and over 1,000 sq. m. (nett) should provide a Retail Impact Statement in the interests of encouraging the careful planning and identification retail needs.
 - Include ban on gun shops, adult shops, sex shops and head shops in Tullow.

More detailed assessment of development proposals can be carried out through the planning application process.

SECTION TEN – COMMUNITY FACILITIES, RECREATION & AMENITY

There is a range of excellent sporting and recreational organizations within Tullow area. However the expansion of the town will mean that expanding recreational demands will have to be catered for through the development and provision of facilities with the plan area. The resort development of Mount Wolseley has added greatly to the amenity leisure and accommodation facilities available to Tullow and the South East region.

The established recreational facilities within the town area provide for the established community. The development of amenity areas within the environs provide for future need including commercial and residential. The town will require the provision of additional recreational facilities.

10.1 Issues

- 1 The expansion of the town will mean that additional recreational demands will have to be catered for through the development and provision of facilities for active and passive recreation within the plan area.
- 2 Pressure is likely to be placed on key open space areas for development within the lifetime of the plan. Development of key open space areas, including the demesnes landscape areas for uses that would be inconsistent with their character is not appropriate.
- 3 Limited community facilities are available within the environs area at present given the limited range of development that has taken place.
- 4 Limited recreational facilities available for increased development.

10.2 Policy Response

The full range of provision of community facilities and amenities will have to be promoted and facilitated through the Proposed Local Area Plan. This will include provision for:

- Passive and active recreation areas.
- Community Halls and meeting areas. Play areas.
- Public walks.
- Community facilities

Such facilities are best provided in association with other services such as local retail facilities and local/neighbourhood scale retail development.

10.3 Specific Objectives

- 1 The location of community facilities (buildings) and services within the development areas, or the provision of contributions to the development of such facilities will be required of all developers. Developers will be required to provide such contributions in respect of public infrastructure and facilities benefiting development in the area.
- 2 The loss of existing public or private recreational open space will normally be resisted by the planning authority unless alternative recreational facilities are provided in a suitable accessible location, or it can be demonstrated that there is no longer sufficient demand to sustain the facility.
- 3 The Council will investigate ways of improving the quality and capacity of existing sporting and recreational facilities through initiatives in both the public and private sector.
- 4 Developers will be required to make provision for sport and recreational infrastructure commensurate with the needs of the development as an integral element of their proposals. Such provision should include direct provision on or off site or a development levy to enable the Council to make appropriate alternative provision. "The said levy shall be in accordance with the requirements of Section 48 (3)(9) of the Planning and Development Act, 2000".
- 5 Designate lands for recreational and amenity purposes. This provision is vital to ensure that increased housing development can avail of adequate recreational facilities.
- 6 Provide new Town Park adjacent to St. Austin's Abbey and River Slaney.
- 7 Upgrade stage in Captain Murphy Memorial Hall as per Councils Strategic Arts Plan 2007 - 2010

SECTION ELEVEN – HISTORIC BUILDINGS & STRUCTURES

11.1 Issues

The protection and preservation of the built environment is important to the future of Tullow environs.

11.2 Policy Response

Carlow County Development Plan contains a list of Protected Structures and proposed Protected Structures, which it is the policy of Carlow County Council to protect in accordance with the provisions of Part IV of the Planning and Development Act, 2000, as amended.

11.3 Specific Objectives

Carlow County Council will endeavour to designate Architectural Conservation Areas following detailed inventory study. Such a survey should be carried out in accordance with the standards set down by the National Inventory of Architectural Heritage Section of the Department of the Environment, Heritage and Local Government and using the methodology suggested by this body.

SECTION TWELVE – INFRASTRUCTURE & ENVIRONMENT

Waste Water Collection & Treatment

Tullow is well served by a newly upgraded sewerage treatment plant and extended pipe network. The sewerage treatment plant has capacity for further development, both residential and industrial and can readily be upgraded to cater for extended development beyond the plan period. Pumping facilities have been added to cater for increased development on the Ardattin Rd. These sources are adequate for the next ten-year period.

Water supply

The water supply for Tullow and its environs comes a local treatment plant on the River Slaney and supplemented by the Carlow North regional supply scheme.

Environment

The construction of the sewerage treatment plant has ensured that the major environmental objective of improving quality in the River Slaney has largely been achieved. This improvement will be monitored during the plan period. The matters of air pollution and noise pollution are dealt with on a continuous basis through planning control and enforcement.

Waste Management

Domestic, commercial and industrial waste are collected at Tullow by private operators and disposed of mainly at the council's central landfill site at Powerstown.

12.1 Issues

Upgrade sewage treatment plant to cater for new developments

12.2 Policy Response

This section sets out Carlow County Councils proposed policy in relation to the environmental aspects of the proposed development in Tullow and its Environs. The proposed policy and specific objectives are dealt with in separate sections of this report. The infrastructural aspects are addressed as follows:

1. Wastewater Collection and Treatment:

- Development shall be limited to the capacity of the wastewater facility available.
- The surface water system will continue to discharge to the River Slaney and will be connected to a separate system from the foul sewer where possible.
- A review of the existing sewer networks, storm and foul, will be undertaken.

2. Water Supply

- Carlow County Council will seek to provide adequate water to supply future developments needs and to reduce wastage within the existing system.

3. Environment

- Carlow County Council will implement the objectives of the County Development Plan and of any guidelines set out by the South East River Basin District Management Plan.

4. Waste Management

The fundamental principle with respect to waste management and water management infrastructure is that of sustainability. The proposed Council policy in respect of waste management is that of placing priority on the EU Waste Hierarchy of waste reduction/minimisation, then recycling, followed by recover, with landfill disposal having the lowest priority.

The proposed Council Policy must extend to the implementation of the polluter pays principle. The implementation of this policy will ensure that the waste producer will cover the cost of waste management.

There is a Waste Management Plan for the South East Region, which is under the direction of the South Eastern Regional Authority. Carlow County Council as a constituent of this body shall adhere to the aims and requirements of this plan.

- Implementation of the EU waste hierarchy.
- Implementation of the polluter pays policy.
- Implementation of the Waste Management Plan for the South East Region as it applies to Carlow County Council

12.3 Specific Objectives

1. Waste Water Collection and Treatment

- The phased upgrading of the existing wastewater treatment facilities to cater for the expanding population and commercial loading from the town and environs
- Expansion and upgrading of the trunk sewer network to facilitate development in the zoned land in the environs of Tullow.

2. Water Supply

- To reduce wastage in the town supply.

3. Environment

- Continue monitoring water quality at River Slaney in conjunction with the objective of the southeast river basin District Management Plan.

4. Waste Management

The specific objectives in relation to waste infrastructure are as follows:

- Continue provision of adequate civic amenity facilities for both residential developments and commercial industrial developments. This will involve the development of new civic amenity facilities along with the upgrading of the existing facilities to cater for the future population and commercial/industrial demand.
- Implementation of a charge structure for waste management to cover the cost as required under the polluter pays principle. This will provide a source of revenue for the construction and operation of waste management facilities.
- Instigation of a requirement on developers to recycle and re-use construction and demolition wastes generated during construction projects in the environs area.

SECTION THIRTEEN – FLOODING

There have been a number of serious flooding incidents from River Slaney in recent years – the 50-year flood level occurring on one occasion. Water Ways Ireland are the authority for the River Slaney. Carlow County Council liaise with Water Ways Ireland in relation to possible remedial measures to mitigate flood occurrence and impact.

13.1 Issues

- Continuous flooding from the River Slaney, which affects residential and commercial properties particularly in Tullow town centre.

13.2 Policy Response

- Liaise with the Office of Public Works and Waterways Ireland to identify remedial measures to alleviate flooding.

13.3 Specific Objectives

- Put in place any affordable measures to relieve flooding as a result of Office of Public Works studies.
- Monitor upstream River Slaney flows to give advance flood warning.
- Assist in provision of local flood relief measures.
- Avoid development in areas at risk of flooding, such as floodplains, unless there are wider sustainability grounds that justify appropriate development; and where the flood risk can be reduced or managed to an acceptable level without increasing flood risk elsewhere;
- Adopt a sequential approach to flood risk management and guide development away from areas that have been identified as being at risk through flood risk assessment; In areas of high risk, for example, you should see water-compatible developments such as docks and marinas, amenity open space, outdoor sports and recreation, while other more vulnerable development should be directed towards areas of minimal or no flood risk.
- Incorporate flood risk assessment into the process of making decisions on planning applications and planning appeals.

SECTION FOURTEEN – LIKELY SIGNIFICANT EFFECTS OF IMPLEMENTING THE PLAN

Assessment of the Likely Significant Effects of Implementing the Plan

This element of the plan has been prepared having regard to the provisions of Section 19(4)(a) of the *Planning and Development Act 2000*, S.I.No. 93 of 1999, the EPA Guidelines on Environmental Impact Assessment, EU Council Directive (96) 5111 + (99) 73 and the subsequent Strategic Environmental Assessment Guidelines, 2004 along with the South East River Basin District Management Project (SERBDM). This section identifies the manner in which the potential environmental impact of the development choices identified in this plan have been considered in the interests of achieving a balance between location, volume and mix of land uses, the development needs of the town and the potential environmental impacts that could be expected.

Overall Strategy

The development of the area will have an impact on its environmental amenity. The impact the development of individual parcels of land will have will be both positive, negative and neutral. However, the overall impact of the range and mix of land uses proposed is intended to allow for a sustainable and balanced approach.

In summary, in order to be sustainable the range and mix of development uses proposed is intended to allow for:

<i>A vibrant mix of uses:</i>	Mixed working areas and new residential areas with the opportunity for some employment generating uses.
<i>The provision of facilities:</i>	Shops, Educational Facilities and Community facilities.
<i>A hierarchy of open spaces:</i>	Local Parks, Neighbourhood Parks, Regional Parks.
<i>Integrated transport system:</i>	Opportunity for modal choice, pedestrian movement as a key mode of movement, cycle ways.

The proposed zoning and development strategy allows for all of the above. However, as noted previously development will have an impact on individual elements of the environment. These are detailed on the following pages.

Human beings

The effect of development on existing human beings within the plan area will be significant. The development of additional housing, commercial and industrial lands will result in an increase in the built area of the town and its environs. However, these lands are provided in a planned manner that is consistent with a sustainable development strategy and in general terms the provision of appropriate residential land and employment lands will provide for socio-economic needs.

Flora

The principal impacts in flora in the area will occur as a result of the development of the new built up areas. However, development will occur in area that are not unique in flora terms and are already committed to development as a result of current planning permissions.

Fauna

The principal impacts on fauna in the area will occur as a result of the development of the extensive built up areas. However, development will occur in areas that are not unique in fauna terms and are already committed to development as a result of current planning permission.

Soils

No significant impact will occur to soil resources in the area as a result of the development. Impacts will occur to soil in the area as a result of re-profiling and excavation associated with the development; this is unavoidable. The impact will not however be significant.

Water

The principal impacts in the area's water resources will occur as a result of an increase in demand for water resources and an impact due to surface water run-offs and foul water discharges from new development areas. These can be catered for with improvements to foul and surface water infrastructure and water provision in the area. In the respect the impact on the area's water resources will be neutral.

Air

The development of the area will result in changes in air quality as a result of the emissions that can be expected from properties and vehicles. This may result in an increase in emissions although over the longer term the development of more energy efficient houses, properties and vehicles may not result in a significant increase in emissions over current levels. In this respect the development of the areas is likely to have a neutral impact.

Landscape

Significant and lasting changes will occur to the landscape of the area as a result of development. However the retention of significant mature stands of trees and the provision of open space areas integrated in development proposals will have a positive impact on the overall character of an emerging urban area.

Material Assets

The material assets of the area will be improved through the development of additional and improved facilities as a result of development in the area.

Cultural Heritage

The protection of the area's cultural heritage and assets can be achieved through sensitive development. Specific structures and sites will also be protected through planning process thereby ensuring the protection of the area's cultural heritage.

Traffic

Through the development of an urban form that encourages and facilitates the development of an improved modal choice the impact of any additional traffic will be minimised. However, it is vital that the development of the relief route takes place in order to minimise the impact of through traffic on the area.

**SECTION 15 – LAND USE ZONES AND USES
PERMITTED IN PRINCIPLE AND OPEN FOR CONSIDERATION**

ZONE	ZONING OBJECTIVE
<i>Town Centre Activities:</i>	To promote the consolidation of retail, commercial and appropriate residential development.
<i>Residential:</i>	To protect, improve and provide for residential development and amenity.
<i>Low-Density Residential:</i>	To protect, improve and provide for residential development and amenity at a gross density of not greater than 12 dwellings per hectare.
<i>Mixed Use Zones:</i>	To provide for mixed-use employment generating uses.
<i>Community & Education:</i>	To protect and provide for institutional uses, and compatible commercial and residential uses.
<i>Industrial:</i>	To provide for industrial and related uses.
<i>Amenity and Open Space:</i>	To preserve and provide for open space and recreational amenities.
<i>Agriculture</i>	To provide for agriculture and related uses
<i>Resort:</i>	To provide leisure and recreational facilities and associated infrastructure.
<i>Institutional:</i>	To protect and provide for institutional uses, and compatible commercial and residential uses.

Uses either Permitted in Principle or Open for Consideration in the above zones are set out as follows:

Zoning Objective – Town Centre Activities:

Permitted in Principle: Retail, Commercial, Housing, Bed & Breakfast, Car Park, Community Facility, Crèche, Cultural or Recreational Facility, Educational Facility, Guest House, Health Facility, Open Space, Places of Public Worship, Public House, Restaurant, Hot Food Take Away, Local Shop, Sports Facility, Services such as Office Based Industry Activities, Data Processing, Software Development, Information Technology, Technical Consultancy, Commercial Laboratories/Healthcare, Research and Development, Media Recording and associated uses, Publishing and Telemarketing, Hotel and Leisure.

Open for Consideration: Advertisements and advertising, Structures, Garage/Filing station, Motor Sales Outlet.

Zoning Objective – Residential

Permitted in Principle: Housing, Bed & Breakfast, Car Park, community Facility, Crèche, Cultural or Recreational Facility, Educational Facility, Guest house, Health Facility, Open Space, Places of Public Worship, Public House, Restaurant (excluding Hot Food Take Away), Local Shop, Sports Facility.

Open for Consideration: Advertisements and Advertising Structures, Garage/Filling Station, Motor Sales Outlet, Take Away Hot Food.

Zoning Objective – Low-Density Residential:

Permitted in Principle: Housing, Bed & Breakfast, Car Park, community Facility, Crèche, Cultural or Recreational Facility, Educational Facility, Guest house, Health Facility, Open Space, Places of Public Worship, Public House, Restaurant (excluding Hot Food Take Away), Local Shop, Sports Facility.

Open for Consideration: Advertisements and Advertising Structures, Garage/Filling Station, Motor Sales Outlet, Take Away Hot Food.

Zoning Objective – *Mixed Use Zones:*

Permitted in Principle: Light Industrial Business and Services such as Office Based Industry Activities, Data processing, Software Development, Information Technology, Technical Consultancy, Commercial Laboratories/Healthcare, Research and Development, Media Recording and General Media and associates uses, Publishing Telemarketing, Garage/Filing Station and Motor Sales Outlet, Hotel and Leisure, Light Industrial.

Open for consideration: Business Incubator Units, Retail Warehousing and Distribution Centres

Zoning Objective – *Community & Education:*

Permitted in Principle: Crèche, school, sports facility, public recreational building, hospital/medical facility.

Open for consideration: Car Park

Zoning Objective – *Industrial:*

Permitted in Principle: Industry, Light Industry, Public Service Installation, Office (Ancillary to Industry), Car Park, Creche/Nursery (Ancillary to Industry) Enterprise Centre, Station, Public Service Installation, Storage Depot, Warehouse, Workshop.

Open for consideration: Abattoir, Advertisements and Advertising Structures, Agricultural Buildings, Refuse Transfer Station.

Zoning Objective – *Amenity & Open Space:*

‘To preserve and Provide for Open Space Including Recreational Amenity’

Permitted in Principle: Community Facility, Cultural and Recreational Facility, Open Space, Public Service Installation, Sports Facility.

Open for Consideration: Car Park, Cemetery, Golf Course and Club Houses, Places of Public Worship, Restaurant (Excluding Hot Food Take Away).

Zoning Objective – Agricultural:

‘To provide for agriculture and related uses’

Permitted in Principle: Agricultural Buildings for housing of Cattle, Sheep, Goats, Donkeys, Horses, Deer, Rabbits, Pigs, Mink or Poultry and any ancillary provision for effluent storage. Provision of Store, Barn or Shed. Horticultural Enterprise, Mushroom Production, Equestrian Activity, Office/Building Ancillary to above uses

Open for Consideration: Abattoir

Zoning Objective – Resort:

‘To provide leisure and recreational facilities and associated infrastructure’

Permitted in Principle: Resort Facility, Cultural and Recreational Facility, Sports Facility, Golf Course and Club Houses, Restaurant, Hotel and Leisure, Car Park and Health Facility.

Open for Consideration: Public House, Open Space, Creche, Bed & Breakfast, Retail (convenience store), Ancillary Residential/Commercial. .

Zoning Objective – Institutional:

Permitted in Principle: Crèche, school, sports facility, public recreational building, medical facility.

Open for consideration: Car Park

“Open for Consideration” means a use is not acceptable in principle and will only be permitted in special cases where the Council is satisfied that the use would not conflict with the general objective for the zone and could be permitted without undesirable consequences for the permitted uses and which can be allowed subject to compliance with pertinent control criteria consistent with the proper planning and development of the area, having regard to the Local Area Plan. Uses which are not indicated as permitted in principle or open for consideration will be considered in relation to the general policies of the plan, the zoning objectives of the particular area and the proper planning and sustainable development of the area.

Many uses exist where they do not conform to the designated use zoning objectives. Generally such uses, where legally established, shall not be subject to proceedings under the Act in respect of their continuing use. When extensions to, or improvements of premises accommodating such uses are proposed, each shall be considered on its merits and permission may be granted where the proposed development does not adversely affect the amenities of properties in the vicinity and does not prejudice the proper planning and development of the area.

SECTION 16 – COUNTY DEVELOPMENT BOARD STRATEGY
“Cumhacht Comhoibriú” - A Strategy for the Economic, Social & Cultural Development
of County Carlow, 2002 – 2012

“Cumhacht Comhoibriú”, a Strategy for the Economic, Social and Cultural Development of County Carlow is a major initiative to bring about an improved quality of life for all the citizens of County Carlow. The Strategy was prepared by Carlow County Development Board, CDB, and focuses on areas where agencies can work together to improve service delivery in the County. Carlow CDB comprises representatives of Local Government, State Agencies, Local Development and the Social Partners, including the Community and Voluntary Sector.

The Carlow County Development Plan and this Local Area Plan recognises the vision, principles and goals of the Carlow CDB Strategy as outlined hereunder. The aims and objectives of this Local Area Plan are in keeping with Carlow CDB Strategy.

“Cumhacht Comhoibriú”
Vision, Principles and Goals

Vision

“To make it possible for every person in County Carlow to achieve his or her potential and fully participate in all aspects of society through better co-ordination and development of activities and services”

Principles

The CDB established a number of key principles to guide the preparation and implementation of the strategy and commits itself to:

- *Working in partnership with key stakeholders to identify gaps in service provision and developing new and innovative responses to improve the quality of service delivery in the County*
- *Ensuring equality of opportunity for all in County Carlow*
- *Actively consulting and involving key stakeholders and the public in all aspects of the Strategy*
- *Creating and implementing strategies that promote social inclusion, conform to National Policies including the National Anti-Poverty Strategy and Local Agenda 21*
- *Ensuring strategies developed by the CDB are practical and achievable, and that decisions are reached by consensus*
- *Building upon and complementing the work and activity of existing State Agencies, the Local Authority, Local Development Agencies, and the Social Partners*
- *Promoting collective responsibility and shared ownership of the Strategy throughout the County*

- *Ensuring that the Strategy is based on the distinct features and situation pertaining in the County, and will impact throughout the County*
- *Promoting mutual respect by all the participant groups, organisations and agencies of each others diversity, validity and interests*

Goals

In order to achieve its overall vision, Carlow CDB identified eleven themes, which encompass the key issues and challenges addressed in the strategy and developed a goal for each theme

Theme A Business Development

An environment that provides the optimum mix of businesses for County Carlow and generates sustainable quality employment

Theme B Health and Well-being

Improved health and social well-being of people in Co. Carlow through improved co-ordination and development of new and existing activities and services

Theme C Community Development

Co-ordinated voluntary community activity in County Carlow, maximising the positive impact of community development for the benefit of all

Theme D Youth-Work

Quality youth services in County Carlow delivered in a well-resourced, planned and professional manner and to promote the inclusion of all young people in the development of new and existing activities and services

Theme E Childcare

An integrated approach to quality, child centred, accessible childcare for the overall benefit of all children, parents and providers

Theme F Environment

The protection, conservation and enhancement of the environment in Co. Carlow

Theme G Rural Development

To sustain and improve the quality of life in rural areas, by involving local people in the sustainable development of communities in County Carlow.

Theme H Gender Equality

To have gender equality in economic, social and cultural activities in County Carlow

Theme I Tourism

A sustainable tourism industry capable of increasing the inflow of tourists and associated revenues in order to realise the full economic potential of tourism in County Carlow

Theme J Culture

“Ceiliúradh Ceatharlach”, A sense of pride and place through awareness, celebration and conservation of Carlow’s rich heritage & an understanding of our evolving cultural identity for the benefit of all.

Theme K Education and Training

Quality education and training opportunities accessible to all the people of Carlow, so that with true partnership and lifelong learning the holistic development and personal achievement of each person is attained.

SECTION 17 - LIST OF HISTORIC STRUCTURES - TULLOW

Slaney River Bridge Tullow	Four-arch road bridge over river, c. 1855, with triangular cut waters.	
The Coachhouse Dublin Road Tullow	A very fine, architect-designed stable block of circa 1840 facing the Rathvilly-Tullow road. It has a U plan and is built of coursed-rubble granite with gabled wings which have blank, segmental-headed carriage arches with brick dressings to the heads of the arches. Over the arches are small, brick-dressed windows while the gables have finely dressed granite coping. The roof of the stables is now in very poor repair.	
Water Ballif's Hut Tullow	A square-plan watch hut of coursed-rubble granite with open windows and door and steps to the roof. The hut dates from circa 1835 and is an unusual structure	
Tullow Methodist Church/Measum Bridge Street Tullow	A simple, three-bay, gable-ended, single-cell conventicler of circa 1840, built of coursed-rubble granite with a high basement. The pointed doorcase has a granite architrave and is approached up a tall flight of steps which divide at the bottom. The side windows all have brick dressings, are pointed for the hall and square-headed in the basement. The roof has wide eaves and is covered with natural slates	
The Forge Castlemore Cross Tullow	A three-bay, single-storey, architect-designed forge with walls of coursed-rubble granite, a wide, segmental-headed arch in the centre with a brick head, crow-stepped gables and roof of natural slates. The forge probably dates from circa 1870. On the gable end is a wall-mounted, letter box with an ER VII monogram. The forge has been converted to residential use	
St. Austins Abbey Tullow	The house was designed by the partnership of Deane and Woodward circa 1856 and burnt in 1921. It is Venetian gothic in style and built of squared blocks of randomly set granite ashlar. It is increasingly being covered with ivy which is obscuring the finely carved granite details including a balcony, pointed windows and the remains of a granite staircase. Though a ruin this is a very important architectural site	
Church of the Most Holy Rosary, Tullow	The church has been much altered but appears originally to have had a six-bay, single-cell nave. This was widened in the late 19 th century using the same type of pointed windows and with an arcade inserted between the original nave and the aisles. The tower was added about 1840. The interior was thoroughly renovated about 1980 when dormer windows were inserted. The tower and spire are of granite ashlar in a gothic-revival style	
The Courthouse Barracks Street Tullow	The court house is a very unusual design and dates from circa 1820. It is built of coursed-rubble granite with a three-bay, two-storey façade, which has a pair of architraved doorcases with cornice on the ground floor, a stringcourse, on which rest three, architraved, half-moon windows with keystones and timber, radiating glazing-bars. The façade is flanked by massive strip pilasters and topped by a cornice and blocking-course. The North façade has a large, segmental-headed window with original glazing-bars. There are features of the court house such as the doorcases and the treatment of the windows which are similar to the court house in Castlecomer	
Church Of Ireland School Dublin Road Tullow	A very handsome, U-plan school building of circa 1840 built of coursed blocks of rough-cut granite, of five bays and two storeys with large, wide windows on the ground floor and low, wide windows on the first floor – all with granite drip labels. The doorcase has a simple, granite dressing and an elliptical-headed fanlight that is much wider than the door. (The impression is that originally the door was much wider). The roof is low-pitched, covered with natural slates, has two granite stacks and wide eaves with paired brackets. There are further granite walled additions at the rere. The windows have had uPVC glazing-bars inserted	
Holy Well Barrack Street Tullow	A small enclosure which consists of two stiles in a low wall beside the road, a walled path down to a lower level and a hooded niche, with a pointed arch, which contains the well. On the hood are a cross and the words 'Our Queen and Our Mother'. The walls and the niche are whitewashed with blue trimming.	

SECTION 18 - CIVIC and COMMUNITY FACILITIES in TULLOW

Pre-Schools – Tots to Teens (Full Day Child Care), Chatterbox Playschool (Pre-School), Absolute Beginners Playschool (Full Day Child Care) and Happy Tots Pre-School Playschool.

Primary Schools – Scoil Naomha Padraig, Scoil Mhuire Lourdes and St. Columba's National School.

Secondary School – Tullow Community School.

Doctors Surgeries – Dr. Aidan Kehoe and Dr. John Murray.

H.S.E. - Tullow Health Centre.

Care Organisations - Tullow Day Care Centre for the Elderly, Tullow Cairdeas Centre, The Haven Alzheimer's Day Care Unit and St. Patrick's Cheshire Home.

Civic – Tullow Civic Centre incorporating Tullow Branch Library, Tullow CRISP Centre (Computer Training Centre), the Housing Department of Carlow County Council and the Local Area Engineer's Offices.

Family Development – Forward Steps Family Resource Centre.

Sports Clubs with Grounds – Tullow Rugby Club (Senior and Juvenile) , St. Patrick's G.F.C. (Senior and Juvenile), Tullow Town Soccer Club and Parkville United Soccer Club (Senior and Juvenile).

Churches – The Church of the Most Holy Rosary (Roman Catholic) and St. Columba's Church (Church of Ireland).

Resort – Mount Wolseley Hotel, Country and Golf Club (Four star luxury hotel, championship golf course and spa).

Supermarkets – Tesco, Aldi and Supervalu (Lidl granted planning permission for a new store in 2009).

Department of Social and Family Affairs – Branch Office on Abbey Street and twice weekly clinics by Social Welfare Officer.

Broadband – Tullow Telephone Exchange is Broadband enabled.

Town Park – Town Park and Children's Playground available in town centre.

Museum – Tullow Local History Museum.

Nursing Home – Glendale Nursing Home

SECTION 19 – CLUBS & SOCIETIES IN TULLOW

SPORTS

Tullow Rugby Club
St. Patrick's G.F.C.
Parkville United A.F.C
Tullow Town A.F.C.
Tullow / Grange Community Games
Tullow Tae Kwon Do Club
Tullow Golfing Society
Tullow Angling Society

ARTISTIC

Tullow Variety Group
Tullow Stage School

FARMING

Tullow Irish Country Women's Association
Tullow Irish Farmers Association
Tullow Sheep Breeders Association
Tullow Agricultural Show Society Limited

YOUTH

Tullow Youth Project
Tullow Twillers Club
Tullow Scouts
Tullow Girls' Friendly Society
Tullow Boys' Brigade

WOMEN

Mothers' Union

COMMUNITY

Develop Tullow Association Limited
Tullow Tidy Towns
St. Patrick's Day Parade Committee
