

Recreation and Amenity Progress Report July 2016

Oak Park Forest Park

Oak Park Forest Park, on the outskirts of Carlow Town, remains very popular for quiet walks in a beautiful setting. The attractions – universally accessible playground, cleared/replanted forest and exercise areas are of increasing attraction to everybody.

Extensive works have been completed to the surface of the paths to enhance the walkways and to protect the wooden structure from the elements. Damage to many trees and fencing in the Park required works to ensure safety for all users. The Urban Forest Renewal Programme has completed a further stage – the necessary felling and planting of designated areas of the Forest Park. These self-financing works were completed by Emerald Forestry in conjunction with the programme required by the Forestry Service. In recent weeks it has been necessary to remove an extensive amount of overgrowth at footpath areas

Tullow Town Park

At Tullow, the first Skateboard Park is now very popular. Great credit is due to the Members from the Tullow electoral area for their initiative in this proposal – and to the Develop Tullow Association for their great work in maintaining Tullow Town Park. Ecological diversity is a growing feature of the park.

Muinebheag

The Trustees of McGrath Park are to be commended for such a marvellous facility used by hurling, football, soccer, pitch & putt, tennis, athletics and cricket clubs. Bagenalstown Improvement Group under the leadership of Paddy Gardiner is to be congratulated for their marvellous work throughout Bagenalstown, including the Town Park. DIG has been very involved in the implementation of a number of 1916 commemoration initiatives.

River Barrow

Carlow Local Authorities with Carlow Tourism and Carlow will continue to source funding for the priorities of the Barrow Corridor Study. The benefit from the amenities and the facilities recently constructed by Waterways Ireland at Clashganny were highlighted. The improvement of access and parking facilities are now urgent priorities to be considered at Clashganny. Congratulations to Borris Tidy Towns for their progress on a new walkway, proximate to the Lock area. Carlow County Council historically pursued the upgrading of tidal boating facility at St. Mullins in conjunction with Waterways Ireland. The navigation channel of the Barrow has become a matter of serious concern to boaters and fishing interests. Lack of dredging, increased silting and overgrowth will give rise to future flooding. It is impossible to progress any initiative at the Barrow without some remedial action in this respect. Recent serious flooding at St. Mullins highlights the urgency of a solution. The continuous build-up of deposits on the river bed will limit the benefit of flood protection measures and negate those already in place. The navigation channel of the river is becoming limited for regular boat use.

Ducketts Grove Castle and Walled Gardens

Ducketts Grove remains a popular venue for recreational use. Along with the Irish Cancer Foundation's "Relay for Life", the Christmas Fair and other events including the Carlow Tourism Fair and Vintage Club Rally, it is estimated that over 70,000 people approximately visit Ducketts Grove annually.

Carlow County Development Partnership has a Lease on the majority of buildings / the work-shops and exhibition areas are currently not operating. These building are in the charge of CCDP until the end of their lease in 3 years' time. Carlow County Council has no role at these buildings. The canteen area managed by Madeline Forest, provides a good service.

The main buildings remain of keen interest to National and International Paranormal Science Groups. A complete renewal of the herbaceous/floral Garden element was undertaken in December and further works have been carried out to the Gardens in 2016. The garden areas and open spaces are been well maintained by the contractor under the guidance of the Horticultural consultant. All of the verge grass on the approach roads to the Castle have been cut in recent weeks.

SEAI Better Energy Communities 2014

Carlow County Council completed energy upgrades on over 300 houses in 2015. This included upgrading of the heating system, ventilation, windows and doors, lighting and high efficiency stoves. To date over 1,300 houses have received energy upgrades in County Carlow. These works have been very well received by householders – whose energy bills have more than halved and with much greater living quality.

It is disappointing that several communities in the County did not participate in spite of considerable funding being available and a high level of support forthcoming from Carlow County Council. Carlow County Council in conjunction with the Carlow Kilkenny Energy Agency has prepared a schedule of projects for possible grant aid in 2016. Unfortunately Carlow County Council has not been successful in receiving any Grand Aid from SEAI in 2016, we will continue to work with Carlow/Kilkenny Agency to achieve future funding.

2015 Works

1.	Bagenalstown Swimming Club Ltd., Bagenalstown, Co. Carlow.
2.	O'Brien Cement, Bellvue Port, Co. Waterford.
3.	Gairdin Beo, Carlow.
